EDUCATION

Texas A&M University

Bachelor of Science in Applied Mathematics and Computer Science; GPA: 3.5

Aug. 2022 – May 2026 (Expected)

College Station, TX

EXPERIENCE

Software Engineer I (Part-Time)

Jan. 2026 – Present

Ziff Davis Shopping

Austin, TX

- Building loyalty and rewards services using TypeScript, Node.js, and GraphQL for e-commerce brands.

Software Engineering Intern

May 2025 – Aug. 2025

Ziff Davis Shopping

Austin, TX

- Developed functionality for authentication orchestration layer using GraphQL, TypeScript, and Node.js to enable zero-downtime migration from Okta to Ory for **millions of enterprise users**.
- Implemented comprehensive user management APIs with advanced search capabilities, CRUD operations, and GraphQL mutations, directly interfacing with **production Okta systems**.
- Engineered AI customer service chatbot with PHP/Laravel backend integration, automating support workflows and **reducing query response time by 60%** through intelligent CMS data retrieval and query processing.

Technical Lead

Jan. 2024 – Present

Software Subteam, TAMU Formula Electric

College Station, TX

- Led development of **microservices-based** recruitment platform handling 2000+ candidates annually and a purchase orders platform processing **\$10k–\$20k/month** in transactions with PostgreSQL, Prisma, and Next.js.
- Architected IoT telemetry pipeline processing **3,500+ sensor readings/sec** from STM32 CAN nodes, batched over LTE to an MQTT broker on AWS, decoded via a custom Python bridge and streamed to InfluxDB/Grafana.
- Built microservices-based project management platform with Kanban/Gantt views, automated status tracking with AI-generated sprint insights, and an **agentic AI interface** for natural language task creation.
- Mentored 3 junior developers and achieved **100% internship placement rate** for all 8 team members.

Software Engineering Intern

May 2021 – Aug. 2021

RetailMeNot

Austin, TX

- Engineered a **high-performance RESTful API** using TypeScript and Node.js for real-time product tracking, reducing data retrieval time by 70%.
- Standardized endpoint structures and responses with an offshore team, **accelerating timeline** by 3 weeks.

PROJECTS

Constellation | Next.js, AWS Batch, EC2, S3, Gemini, Firebase | TAMUHack '26 Winner

Jan. 2026

- Built an AI-native IDE for high-performance computing that won the **NMC² Cloud Computing track** at TAMUHack '26, replacing terminal-heavy HPC workflows with a visual execution graph and agentic AI interface.
- Developed the AI orchestration system using Gemini, enabling users to describe goals in natural language and automatically construct, execute, and debug **parallel computing workflows** on production AWS clusters.
- Engineered **cloud deployment pipeline** with AWS Batch and dynamically scaled EC2 workers, abstracting scheduler scripts and batch logic to make cluster computing accessible to non-HPC users.

Hermes | Next.js, Fastify, OpenAI, Twilio, PostgreSQL, Prisma, Git

Jan. 2025

- Architected and deployed a **scalable AI call center** using Next.js and OpenAI's Realtime Voice API, enabling businesses to automate thousands of customer interactions through agentic conversation flows.
- Engineered a **concurrent call** processing system with Twilio and PostgreSQL that manages multiple simultaneous conversations, intelligently references business context, and has automated human escalation.
- Built **real-time analytics dashboard** achieving sub-750ms transcription latency across 50+ concurrent calls with live sentiment analysis and automated call summaries.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, Python, SQL (Postgres), GraphQL, PHP, C/C++, R, Java

Frameworks: React, Node.js, Next.js, Laravel, Flask, React Native, Flutter, PyTorch, TensorFlow, WordPress

Developer Tools: Git, Docker, AWS (EC2, Batch, S3, Lightsail), MQTT, InfluxDB, Grafana, Terraform, CI/CD

Libraries: Express.js, Socket.io, Prisma, Pandas, NumPy, Matplotlib, Zod, Jest, Pest, Framer Motion, Three.js
